

***The North Olmsted Fire Department welcomes you to our  
Fire and Life Safety Self-Inspection Program.***

The North Olmsted Fire Department conducts routine annual fire inspections of businesses within the City. The Fire Prevention Bureau has now instituted a small business “Self-Inspection” Program for businesses that are rated as low hazard occupancies. This program will help you to create and maintain a fire safe workplace and also keep our records updated on your business.

This Self-Inspection Form is to be completed by the business owner or their representative. Please complete your inspection each year in the month of January.

If you have any questions or concerns or would like to request that a Fire Prevention Inspector come to your business, please call the North Olmsted Fire Department at (440) 777-1220. Instructions are on the form for submitting once complete.
